PDF Printer Now Online

Link to PDF printing in the footer

With just one click it is now possible to display current websites of Kjellberg's internet portal as PDF files. The so-called PortableDocument Format (PDF) can be opened platform-independantly with numerous programmes. Often, these programmes have already been installed in the browser and the PDF file is opened automatically. The generated pages inA4 format can easily be printed, savedor even sent as email attachment.

The PDF printing option converts forexample aproduct page into a print-optimised product description filefor saving or sending.

All pages which can be converted into a PDFfile contain the link"PDF printing" in the grey footer at the bottom of each web page. Simply click on this link and thePDF file will be generated and displayed.
