

FROM HARD TO ART

The next generation of
mobile plasma cutters

THE NEW CUTFIRE-SERIES

PROFESSIONAL PERFORMANCE WITH EVERY CUT

Kjellberg[®]
FINSTERWALDE

**MAKE THE
BEST CUT**

CUTFIRE – MAKE THE BEST CUT.

Beyond average. CUTFIRE powered by Kjellberg

Our CUTFIRE plasma cutting systems are the ideal choice for manual and automatised applications. With six portable units ranging from 35 A to 125 A, precise results in hand-held use as well as in automated operation can be achieved. From 45 A, all models feature a marking function a CNC interface for smooth integration into your production line.

Robust design and intuitive usability

Machines and torches impress with their modern, ergonomic design. The intuitive digital display makes it simple to adjust and monitor all parameters. Combined with digital pressure control and the exclusive Kjellberg torch connection, the systems ensure reliable processes and maximum efficiency.

Versatile for every cutting project

The CUTFIRE covers a wide range of applications: from classic cutting and grid cutting to gouging and marking, – a true all-rounder. Whether in CNC operations, workshops, during maintenance work or directly at the construction site – its reliable performance, high precision and cutting quality is ensured.
