

# SERVICE PACKAGES

We offer you individual maintenance services – combined in profitable packages – in order to always maintain the operational safety and to further increase the lifetime of your plasma cutting system.

## Preventive Maintenance

Recommended maintenance intervals of the components of your Kjellberg plasma machine:

### Yearly

- ✓ All air-break contactors
- ✓ Filter mats
- ✓ Kjellfrost

### After 4 years

- ✓ Main contactor

### After 5 years

- ✓ All fans

### After 6 years

- ✓ Coolant pump
- ✓ All relays

Subject to change without notice.

11|02|26

## Service directly from the Manufacturer

Please feel free to contact us. We will be happy to check your requirements and prepare an individual offer for the smooth operation of your plant – because nobody knows your plant as well as we do.

### Service Packages

Change of the components corresponding with the operating year or operating hours

Change of coolant and environmentally appropriate disposal

Cleaning of the power source and its components

Inspection of the components

Training for operators and technicians (on request)

Test of electrical equipment acc. to DGUV V3

### Maintenance Packages
